模块：**C# DbDataAdapter**

时间：**2017-08-10**

编写人：小帅

版本：**V1.0**

DbProviderFactories

Aids implementation of the IDbDataAdapter interface.

命名空间：System.Data.Common

程序集：System.Data（位于 System.Data.dll）

语法

```
public abstract class DbDataAdapter : DataAdapter, IDbDataAdapter,
    IDataAdapter, ICloneable
```

构造函数

DbDataAdapter()

Initializes a new instance of a DataAdapter class.

属性

SelectCommand

Gets or sets a command used to select records in the data source.

方法

Fill(DataSet)

Adds or refreshes rows in the DataSet.

```
ataSet dataSet = new DataSet();
dbDataAdapter.Fill(dataSet);
```
