模块：C# DbProviderFactory
时间：2017-08-10
编写人：小帅
版本：V1.0

DbProviderFactories

Represents a set of methods for creating instances of a provider's implementation of the data source classes.

命名空间：System.Data.Common
程序集：System.Data（位于 System.Data.dll）

语法

```
public abstract class DbProviderFactory;
```

方法

CreateConnection()
Returns a new instance of the provider's class that implements the DbConnection class.

```
DbConnection dbConnection = DbProviderFactory.CreateConnection()
```
